

Amy

Speech Pathologist

<i>Qualifications</i>	Bachelor of Speech Pathology
<i>Why I work at Firstchance</i>	I love working as a speechie supporting young children with disabilities and their families in a fun, family focused and evidence based way. It is wonderful to see the progress that our little ones make and there is nothing better than witnessing a child achieve a major milestone like saying a word for the first time! I choose to work at Firstchance because of the amazing team I get to be part of. The team is friendly, caring, passionate, knowledgeable and genuine about supporting children and families to reach their goals.
<i>The skills I bring to Firstchance</i>	I have worked as a speech pathologist in a variety of settings including early intervention, private practice, mainstream and special education schools in Australia and the UK. I have particular knowledge and interest in parent coaching programs such as Hanen, social skills support and feeding therapy. I love learning new strategies, implementing different programs and trying new toys in therapy! I am passionate, innovative, friendly, empathetic and a good listener. I am always on the lookout for how I can improve my skills and the knowledge and resources of our organisation to better support our families.
<i>Outside of work I like to</i>	Spend time with my family and friends, go for long walks in nature, travel, watch movies and curl up with my cat for afternoons of reading whilst enjoying plenty of tea and chocolate!!
